EMPOWERING

Our Mission & Vision

TOMORROW'S SOLUTION

Throne Solutions is a premier provider of innovative IT solutions, committed to excellence and client satisfaction. With a global presence, we have successfully partnered with businesses across various industries to deliver top-notch IT, cloud, and solutions tailored for modern enterprise demands.

We are strategically expanding our global portfolio with a strong focus on enterprise-grade, full-stack IT services in the global market, designed to support the digital backbone of multinational organizations from on-site infrastructure to cutting-edge cloud transformation and innovation.

Our Global Impact

2000+
Global Resources

300+
Solutions Delivered

100+
Satisfied Clients

1%
Escalation Rate

We have a significant presence across the globe, including APAC, EMEA, LATAM and USA. We collaborate with businesses worldwide, focusing on providing expert IT Field Engineer teams and comprehensive field engineer management services. We oversee and coordinate new ideas and processes from initial inquiry to complete customer satisfaction.

Our core capabilities are built on the philosophy that smart people, smart processes, and smart technologies provide a strong foundation for a best-in-class experience with our clients. Our field-tested Integrated Service Delivery Framework consistently enhances the value we deliver.

Why Partner With Throne Solutions?

Cost-Effective Solutions

Quality services meticulously tailored to your budget, ensuring maximum ROI and efficiency.

Unrivaled Expertise

Years of hands-on IT support and innovation, with adaptable services that grow with your business demands.

Client-Centric Approach

Dedicated to providing outstanding customer support and fostering strong, collaborative partnerships.

Cutting-Edge Innovation

Leveraging cutting-edge technology for superior service delivery.

24/7 Global Support

Round-the-clock IT solutions with over 2000 global technicians offering comprehensive multi-vendor support.

Tailored Solutions

Customized strategies and solutions meticulously designed to meet your unique business requirements and challenges.

Network Services & Connectivity

Managed WAN, LAN & WLAN

End-to-end design, implementation, and monitoring of enterprise networks.

Wi-Fi Survey & Optimization

Coverage analysis, interference mitigation, and access point configuration.

AVPN (Advanced Virtual Private Network)

Secure, high-performance virtual private networking for branch and remote access.

SD-WAN Solutions

Dynamic routing, application-aware traffic management, and centralized control.

Networking & Connectivity

Reliable WiFi services, network design, and maintenance.

Ekahau Wi-Fi Site Surveys

Conduct predictive and active RF surveys with Ekahau Pro to generate heatmaps, analyze signal coverage and interference, and optimize wireless capacity planning.

Infrastructure Management & Support

Data Center Operations

Rack & stack, cabling, monitoring and vendor coordination.

Server Installation & Migration

Physical/virtual server provisioning and platform migration.

Network Setup & Expansion

IP planning, subnetting, VLAN design and firewall configuration.

Hands & Feet / Eyes Onsite Support

Remote troubleshooting, hardware swaps, and visual diagnostics.

Power & Cooling Management

UPS configuration, thermal audits, and rack planning.

IMAC Services

Ensure seamless IT infrastructure updates and modifications.

Third-Party Maintenance

Dependable support for IT hardware across multiple vendors.

Hardware Break Fix

Rapid repair solutions for IT equipment.

Global Field Services

On-site IT infrastructure support worldwide.

Linux Maintenance & Troubleshooting

Secure and optimize Linux environments.

End-User & Workplace IT Services

Desktop & Endpoint Support

Device provisioning, OS configuration, break/fix, and software troubleshooting.

IT Helpdesk (L1–L3)

24/7 multilingual expert IT assistance for enterprise users.

Remote & Hybrid Work Support

VPN setup, productivity suite support (O365/Google Workspace), remote desktop.

VIP & Executive IT Support

White-glove service for senior staff.

Virtual Support Services

Virtual accountants, assistants, and remote support teams.

Facilitative Management & Vendor Liaison

Field Engineer Coordination

Oversight of local technicians, handovers, and task validation.

Multi-Vendor Management

SLAs, escalations, and ticket follow-ups with OEMs and partners.

Change Management Support

Documentation, approvals and post-deployment audits.

Server Lifecycle Services

Physical & Virtual Server Support

RAID configuration, BIOS updates, OS patching.

Lifecycle Management

Decommissioning, secure wipe, and asset recycling.

Backup & Disaster Recovery

Snapshotting, offsite backup, BCP runbooks.

Procurement & Deployment

Hardware/Software Procurement

Global sourcing, pricing, and licensing.

IT Logistics

Warehousing, international shipping, customs handling.

Full Rollout Planning

Asset delivery, onsite installation, documentation.

Asset Disposal

Secure and environmentally responsible IT asset disposal.

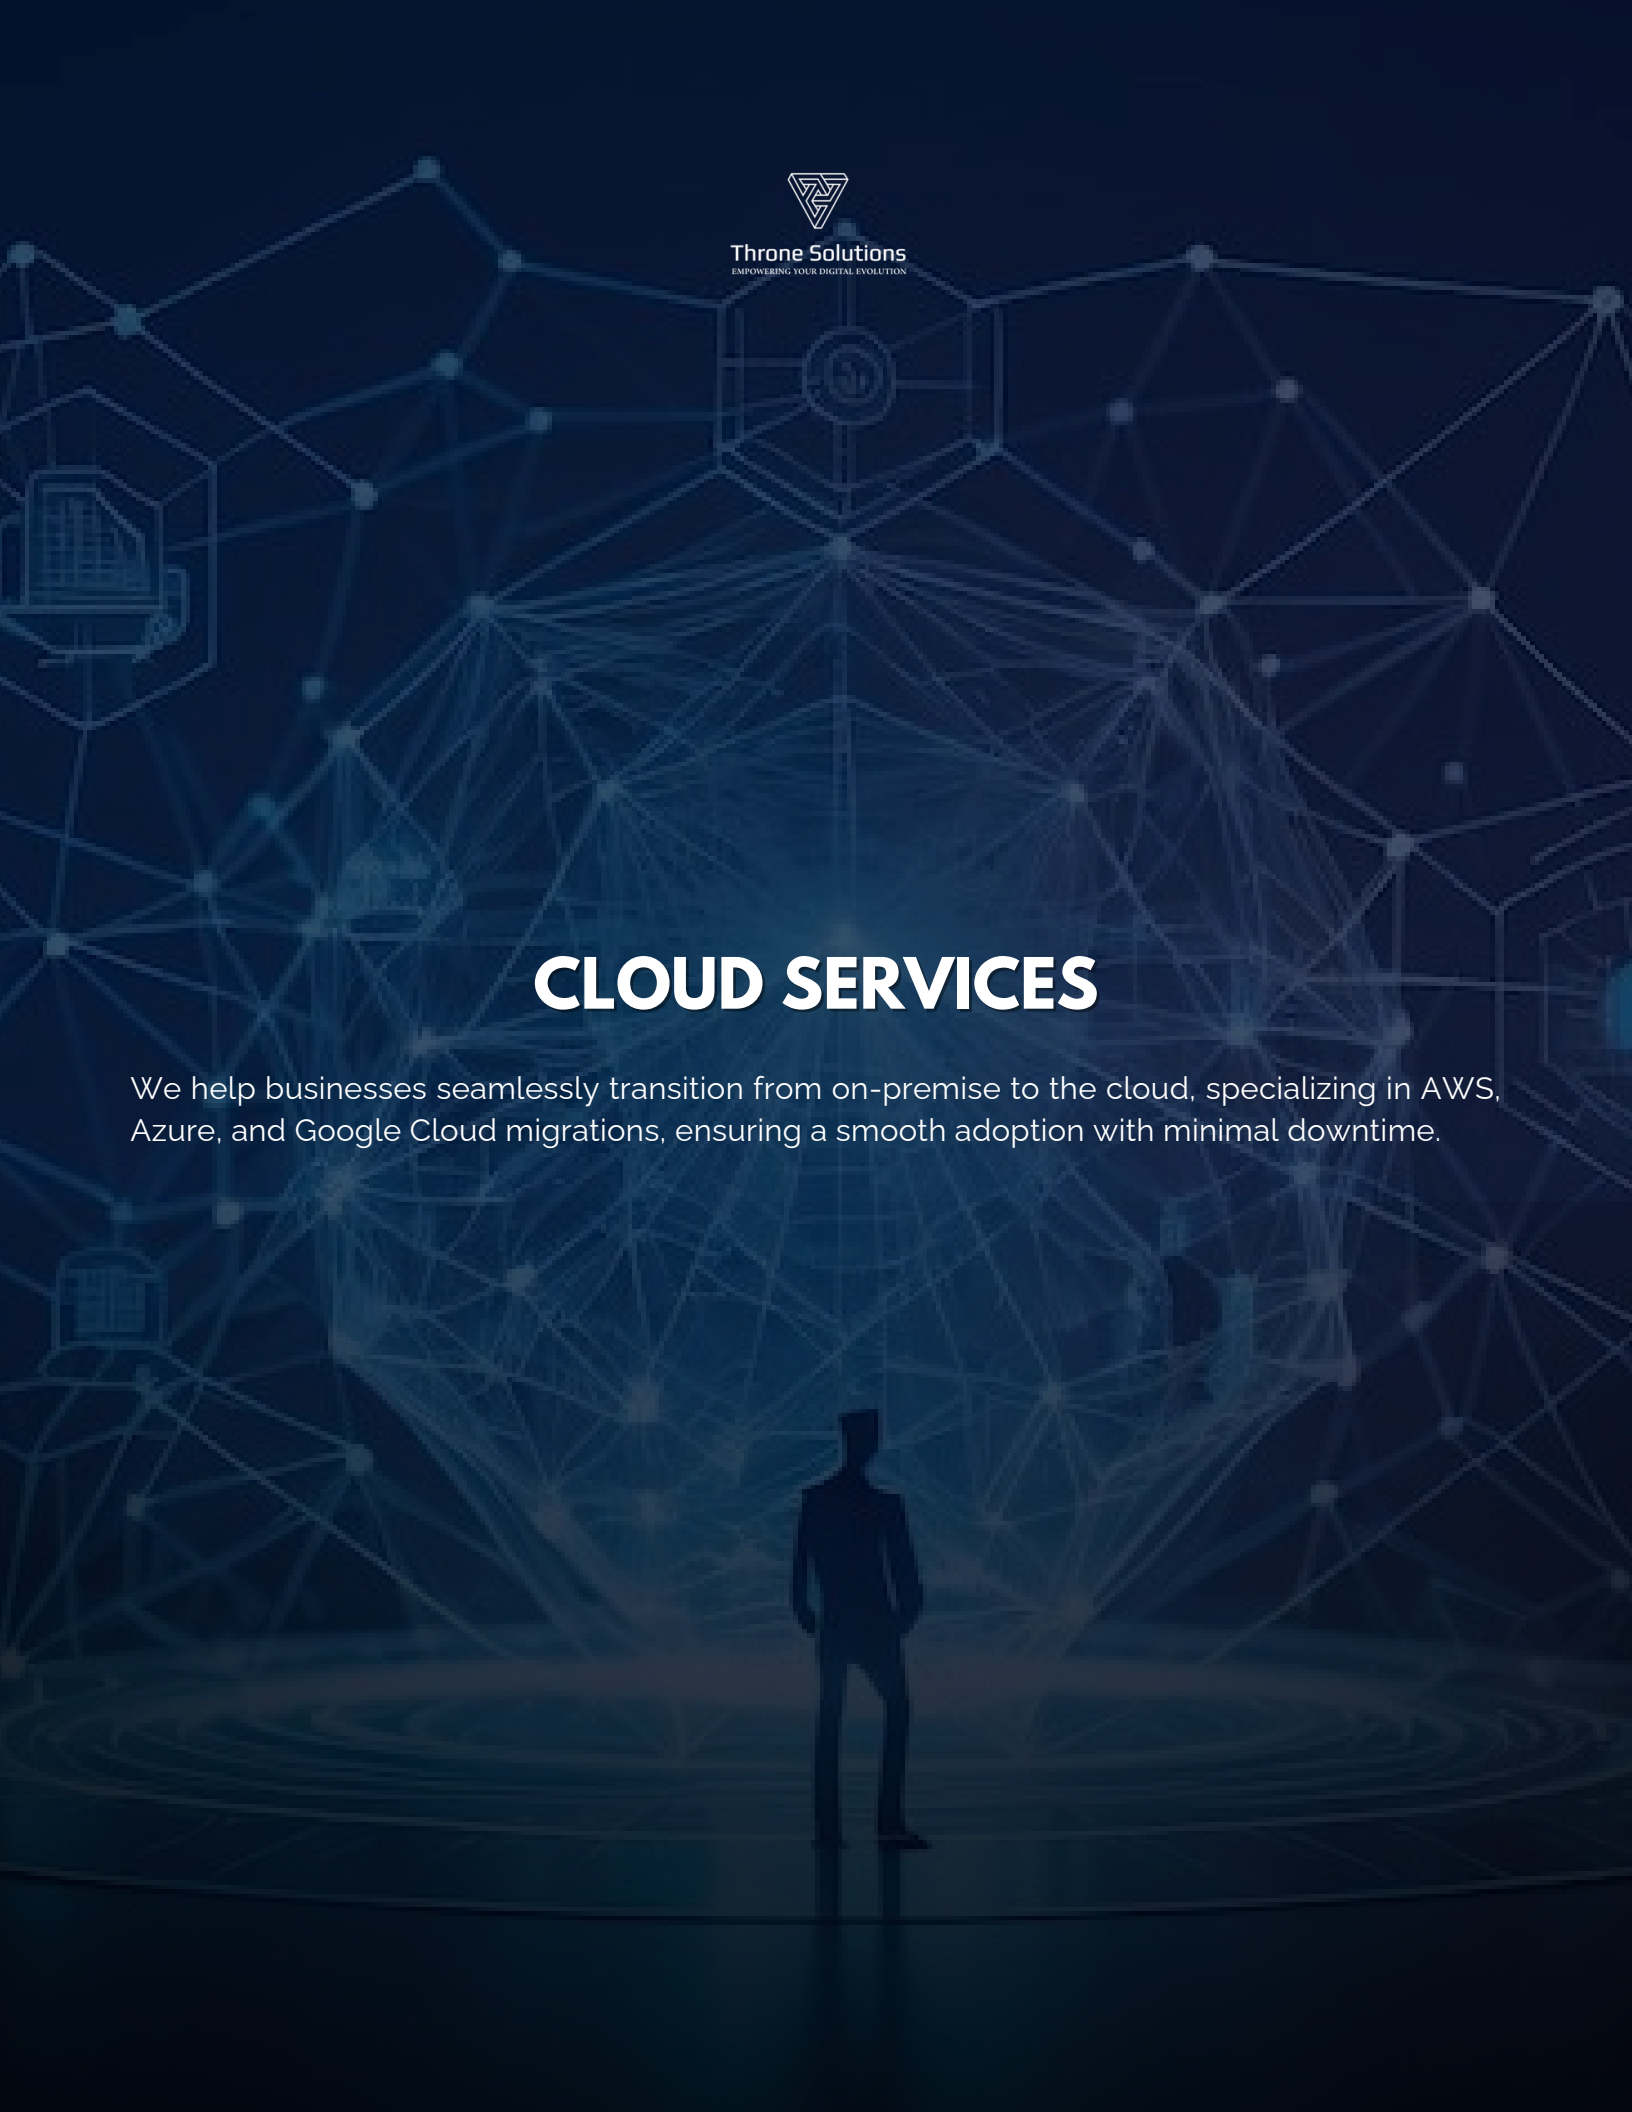

Site Survey & Installation

On-site IT setup and deployment services.

Retail Support

Ensure uninterrupted retail operations with expert IT support.

CLOUD SERVICES

We help businesses seamlessly transition from on-premise to the cloud, specializing in AWS, Azure, and Google Cloud migrations, ensuring a smooth adoption with minimal downtime.

Cloud Infrastructure

Managed cloud hosting, serverless computing, and containerized environments.

Cloud Security & Compliance

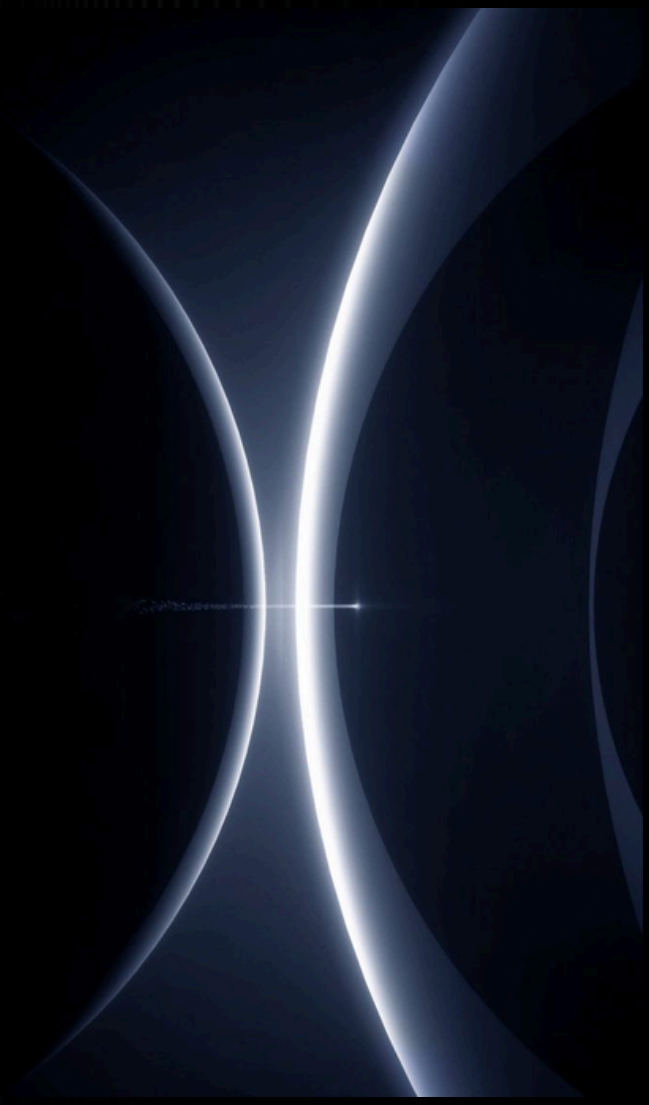

Identity & access management (IAM), encryption solutions, and governance policies.

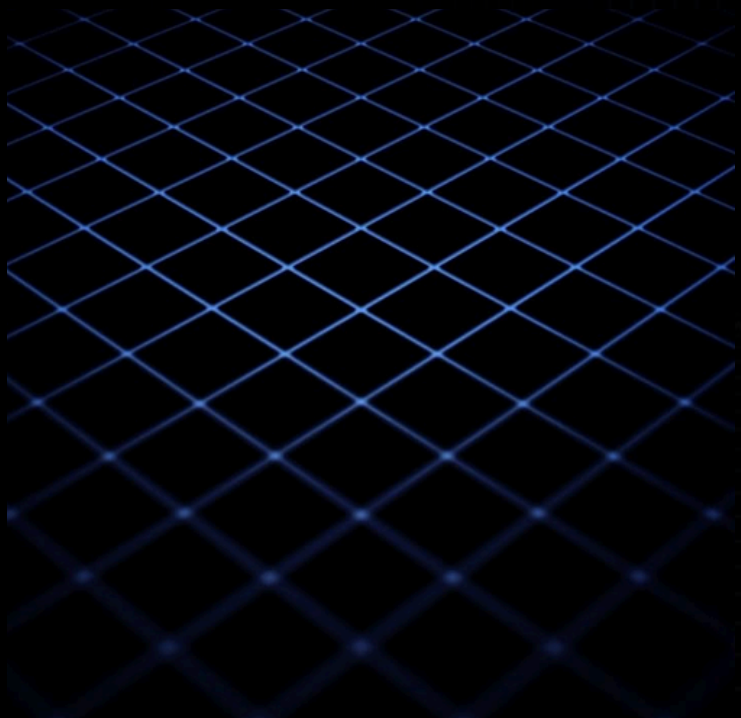

Disaster Recovery & Backup

Business continuity planning, automated backups, and failover strategies.

Cloud Human Resource Solutions

Freelance cloud professionals: engineers, architects, DevOps, security experts, consultants.

Cloud Transformation

Azure, AWS, GCP deployment & migration services.

Cloud Security

IAM, encryption, regulatory compliance (GDPR, HIPAA).

Cloud DevOps

CI/CD, infrastructure as code, monitoring automation.

Cybersecurity & Compliance

Cybersecurity Solutions

Secure and optimize Linux and Windows environments.

Firewall & Threat Protection

Fortinet, Palo Alto, Cisco ASA configuration and monitoring.

Zscaler, ClearPass & SASE Implementation

Policy-based zero-trust access and endpoint isolation.

Antivirus & Endpoint Security

EDR, MDR, and centralized threat hunting.

Audit & Compliance

Penetration testing, vulnerability assessment, and ISO/PCI/HIPAA alignment.

Throne Solutions
EMPOWERING YOUR DIGITAL EVOLUTION

AI-POWERED SOLUTIONS & CYBERSECURITY SERVICES

At Throne Solutions, we merge Artificial Intelligence with ethical cybersecurity to provide smart, scalable, and secure solutions tailored for enterprise growth. Our offerings span across automation, analytics, digital twins, and intelligent security—empowering clients to stay ahead in a rapidly evolving tech landscape.

AI-Based Workflow Automation

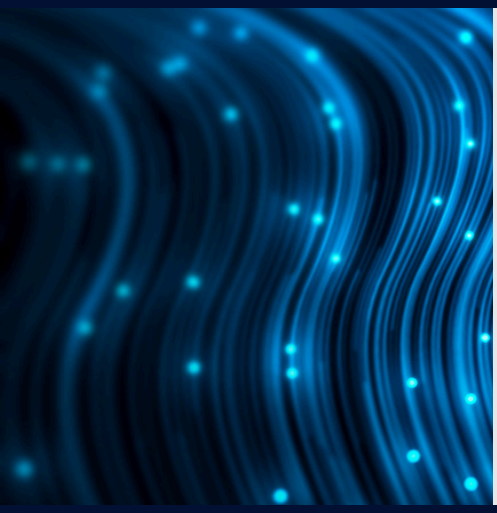

Automating full-stack AI workflows across ITSM, HR, finance, and procurement to accelerate processes and improve accuracy.

Market Simulation & Risk Analysis

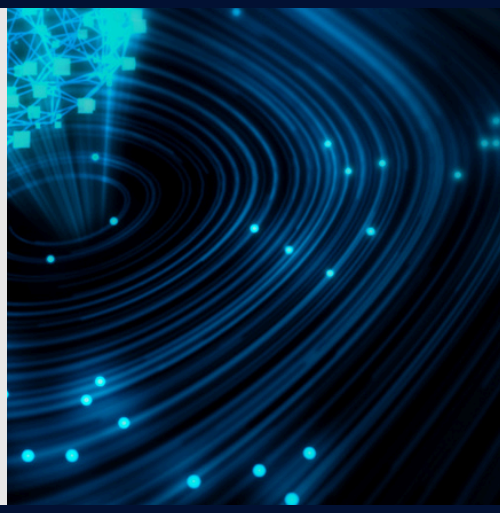

AI agents analyze real-time, historical, and geopolitical data to predict market trends with 70–80% accuracy, providing traders and analysts with actionable insights.

Generative AI for Synthetic Data

Generates labeled synthetic datasets to enhance AI and ML model training in finance, healthcare, and retail, while enabling faster, privacy-safe AI prototyping.

Core Artificial Intelligence Solutions

Personalized AI Tutor Systems

Real-time adaptive learning with dynamic questions and feedback for EdTech, L&D, and STEM.

Digital Twin Engineering (AI + IoT)

Live digital twins for equipment and systems enabling predictive maintenance and efficiency, used in automotive, industrial, and real estate sectors.

Computer Vision Intelligence

Automated visual detection and inspection using AI integrates with cameras and IoT to enhance surveillance, smart cities, medical imaging, and manufacturing quality control.

Vulnerability Assessment & Cyber Hardening

VAPT & Ethical Hacking

Penetration testing identifies vulnerabilities in websites, APIs, servers, and networks, providing compliance reports and remediation plans.

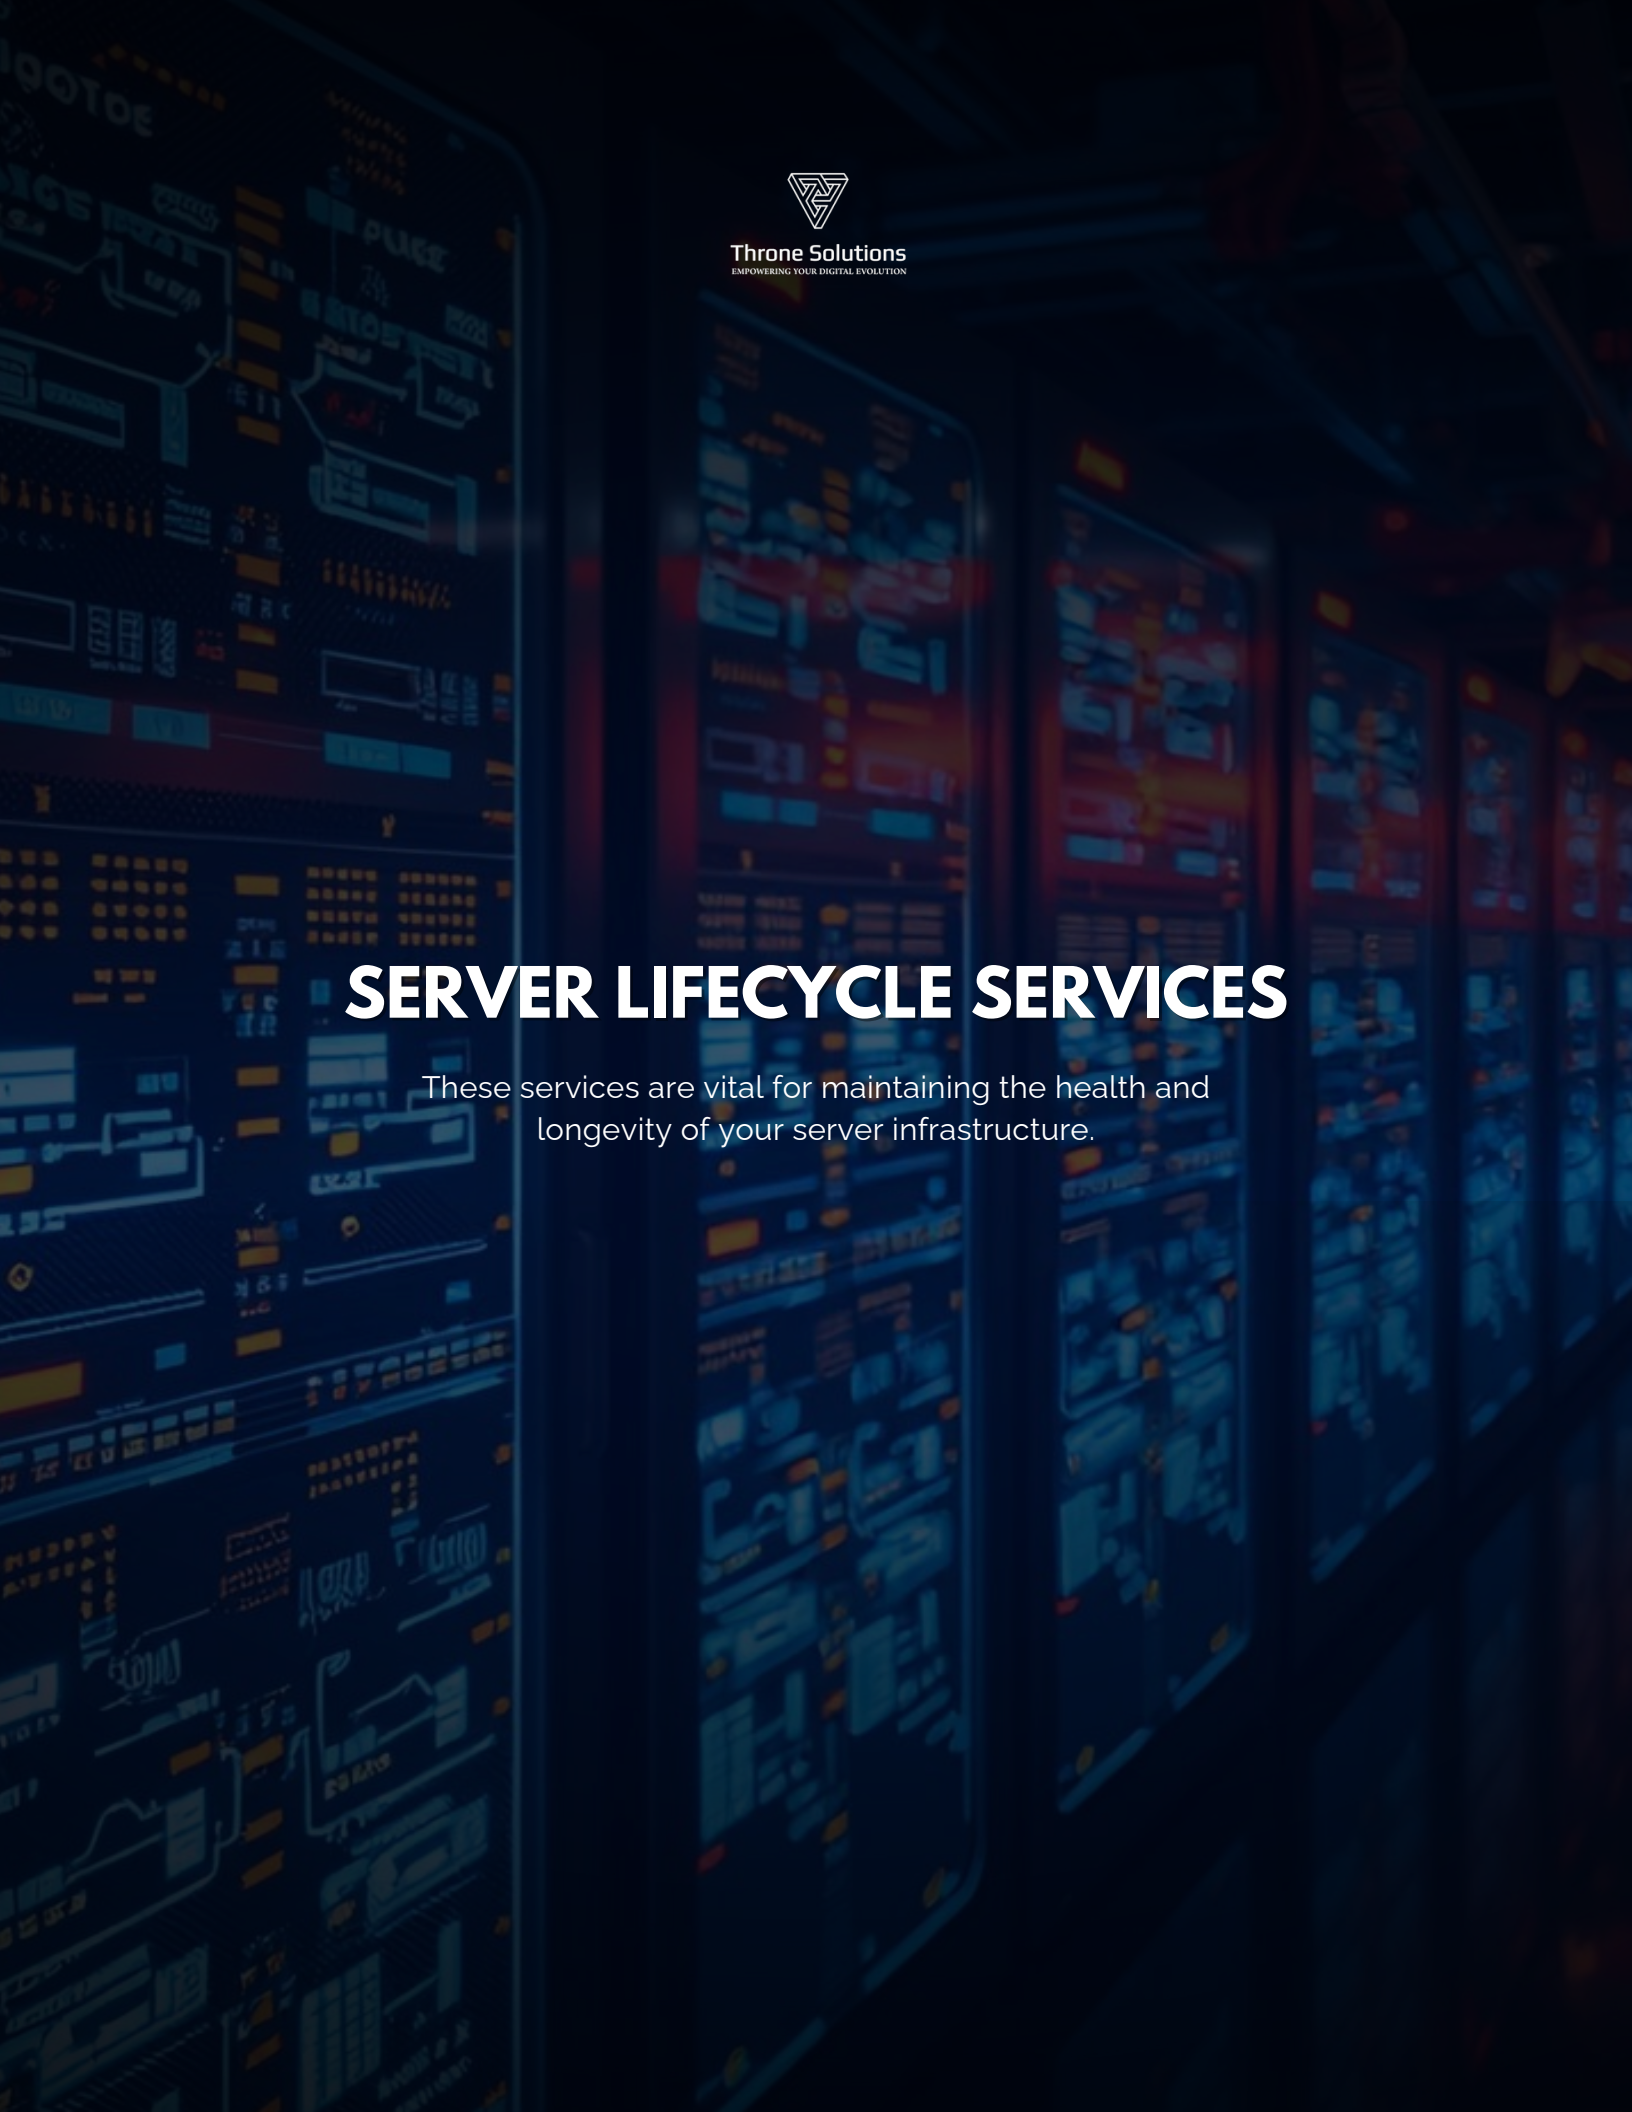

Post-VAPT Cyber Defense

Comprehensive security hardening and real-time protection of web, network, and cloud assets with incident response and ongoing risk management.

AI-Driven R&D Focus

AI for Personal Health Data Synthesis & Prediction

Generative models analyze lifestyle data to predict health risks and provide wellness recommendations, integrating with wearables and wellness platforms.

SERVER LIFECYCLE SERVICES

These services are vital for maintaining the health and longevity of your server infrastructure.

Physical & Virtual Server Support

RAID configuration, BIOS updates, OS patching.

Lifecycle Management

Decommissioning, secure wipe and asset recycling.

Backup & Disaster Recovery

Snapshotting, offsite backup, BCP runbooks.
